1. Remove the two manifold screws, flat washers and lockwashers (A) from the pump. Install the accessory bracket (1) so its large hole faces up. Install the screws and lockwashers (do not use the flat washers).
2. Remove the male quick disconnect fitting (K) from pump and install it in the air filter inlet (J).
3. Hold the FRL with the air filter (H) to the left. Install the gauge (C) in the BACK port of the regulator (not the top), and turn it so the gauge will face up. Install the plug (G) in the FRONT port of the regulator.
4. Remove the lock ring (F) from the base of the air regulator knob.

5. Angle the FRL into the bracket so the gauge slides into the slot in the bracket. Screw the lock ring (F) over the regulator knob to secure the assembly to the bracket.
6. Install a 90° nylon connector (2) to the FRL outlet on the side of the lubricator. Install the other connector to the pump air restrictor inlet (not visible here). Tighten the connectors in a position that will allow easy installation of the nylon tube (3). Install the tube.
