6	GASKET; copper	2			

Installation

See instruction manual 309032 for troubleshooting guide. Replace all parts included in this service kit, checking all parts thoroughly when disassembling, and carefully replace any additional parts that are worn or damaged.

Adjustment

WARNING

To reduce the risk of serious injury whenever you are instructed to relieve pressure, always follow the **Pressure Relief Procedure** in instruction manual 309032.

1. Relieve the pressure.

2. To adjust the clearance, loosen the top nut (Fig. 1, item 5) and turn the bottom nut (5) in or out as needed. Hold the bottom nut in place and securely tighten the top nut.
3. For less than maximum flow, back off bottom nut (5).

Torque 80 – 100 ft. lbs.

-  Turn adjusting nut (5) down until yoke bottoms out on rod guide or until resistance is noticeably greater (max flow setting)
