Instructions
RACX HandTite™ Guard

GRACO®

Model 246215, Series A, 7/8 in. Guard
4050 psi (280 bar) Maximum Working Pressure

Model 246437, Series A, 11/16 in. Guard
4050 psi (280 bar) Maximum Working Pressure

309640 rev.A

- Patented aerodynamic design virtually eliminates paint buildup.
- Hand tighten on gun–no tools required.
- Fits all Graco airless spray guns.
- Use with RACX series SwitchTips only.
- Graco RACX SwitchTip sold separately.

⚠ WARNING

To reduce the risk of fluid injection or splashing in the eyes or on the skin, relieve air and fluid pressure in the system before installing, cleaning or changing tips. See **Pressure Relief Procedure** in gun or sprayer manual.

- **Keep clear of spray tip.** High-pressure spray or leaks can inject fluid into the body, resulting in serious injury which may require amputation. Never spray without a tip guard (D).

- Do not exceed 4050 psi (280 bar, 28 MPa) maximum working pressure.

Failure to install or use the RAC™ tip guard assembly correctly may result in an undirected spray of fluid into the eyes or on the skin of the operator. Be sure you:

- Fully insert SwitchTip (A) into tip bore (C) in guard

- Do not trigger gun with SwitchTip handle between **Spray** and **Clear** positions

- Replace OneSeal™ when replacing worn SwitchTip

---

Installing   Disassembling

1	2	
Use end of SwitchTip (A) to press OneSeal (B) into tip guard (D), with curve matching tip bore (C)	Insert SwitchTip in tip bore and firmly thread assembly onto gun	Use SwitchTip handle to remove OneSeal from tip guard
