

NON-RETURN VALVE DN 10 R 3/8

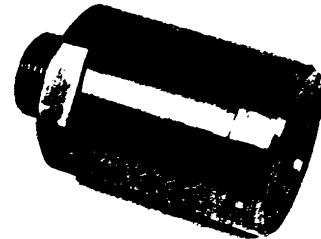

Ball bearing seat valve or non-return valve with a spring-loaded ball as the blocking element

Part number 77588 003001

Special compatibility

The non-return valve is preferably used for the diaphragm pump 001.085-DP and also with the ND pressure regulators, as protection against damage due to increase in fluid volume caused by heat.

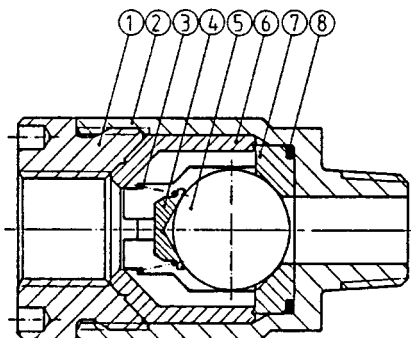

The non-return valve is also suitable because of the low opening pressure and the materials used for the air pressure stems.

Technical data

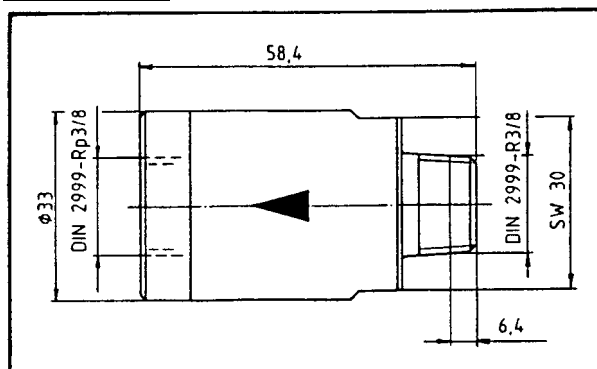

Nominal width (DN)		10	mm
Opening pressure	ca.	0.1	bar
Operating pressure	max. permissible	16	bar
Temperature of use	max. permissible	85	°C
Weight		186	g

Construction materials

①	Union nut	SST 1.4104
②	Coupling sleeve	SST 1.4305
③	Spring	SST 1.4310
④	Spring plate	POM
⑤	Ball	POM
⑥	Ball guide	POM
⑦	Valve seat	SST 1.4104
⑧	O-Ring	FPM

Dimensions

Installation location: free

Remark :

Only complete valves can be supplied as replacement part.

Replacement for issue of 06.89
Subject to change
