Niet alle modellen zijn in alle landen verkrijgbaar.  
Nicht alle Modelle sind in allen Ländern verfügbar.

## ⚠ WARNING

**Fire and explosion hazard:** Solvent and paint fumes can ignite or explode.

To help prevent a fire and explosion:

- Use in an extremely well ventilated area.
- Eliminate all ignition sources; such as pilot lights, cigarettes and static arcs from plastic drop cloths. Do not plug or unplug power cords or turn lights on or off in spray area.
- Ground Sprayer, object being sprayed, paint and solvent pails.
- Hold gun firmly to side of grounded pail when triggering into pail.
- Use only conductive airless paint hose.
- Do not use 1,1,1-trichloroethane, methylene chloride, other halogenated hydrocarbon solvents or fluids containing such solvents in pressurized aluminum equipment. Such use could result in a chemical reaction, with the possibility of explosion.

**Fluid injection and high pressure hazard:** High pressure spray or leaks can inject fluid into the body.

To help prevent injection, always:

- Engage trigger safety latch when not spraying.
- Keep clear of nozzle and leaks.
- Never spray without a tip guard.
- Do **PRESSURE RELIEF** if you stop spraying or begin servicing sprayer.
- Do not use components rated less than sprayer *Maximum Working Pressure*.
- Never allow children to use this unit.
- Brace yourself; gun may recoil when triggered.

If high pressure fluid pierces your skin, the injury might look like "just a cut". But it is a serious wound! Get immediate medical attention.

**Risques d'incendie et d'explosion:** Les vapeurs de solvant et de peinture peuvent s'enflammer ou causer une explosion.

Pour empêcher tout incendie et explosion:

- N'utiliser ce matériel que dans des locaux extrêmement bien aérés.
- Éliminer toutes les sources de feu, comme les veilleuses, cigarettes et les arcs statiques provenant de bâches plastique. Ne pas brancher ou débrancher de cordon électrique ou allumer ou éteindre la lumière sur un site de pulvérisation.
- Raccorder le pulvérisateur, l'objet à peindre et les seaux de peinture et de solvant à la terre.
- Appuyer le pistolet contre le côté du seau mis à la terre quand on pulvérise dans le seau.
- N'utiliser que des flexibles de peinture conducteurs sans air.
- Ne jamais utiliser de trichloroéthane-1,1,1, de chlorure de méthylène, d'autres solvants à base d'hydrocarbures halogénés ni de fluides contenant de tels solvants dans une unité sous pression en aluminium. Cela pourrait provoquer une réaction chimique avec risque d'explosion.

## ⚠ MISE EN GARDE

## ⚠ WAARSCHUWING

**Gevaar van brand en explosie:** Dampen van oplosmiddel en verf kunnen tot ontbranding komen of exploderen.

Voorkom brand en explosie:

• Werk alleen in zeer goed geventileerde ruimten.

- Draai alle ontstekingsbronnen uit; denk aan waakvlammen, sigaretten en statische vonken van een dekkleed of afdekplastic. Steek geen stekkers in een haal geen stekkers uit stopcontacten in de ruimte waar gespoten wordt.
- Aard het spuittoestel, het te spuiten voorwerp, en de emmers met verf en oplosmiddel.
- Houd het pistool stevig tegen de zijkant van een geraarde emmer gedrukt terwijl u in de emmer spuit.
- Gebruik alleen geraarde slangen voor airless sputten.
- Gebruik in aluminium apparatuur onder druk geen oplosmiddelen of sputtvloeistoffen die 1,1,1-trichlorethaan, methyleenchloride of andere gehalogeneerde koolwaterstoffen bevatten. Dit kan namelijk leiden tot chemische reacties, met kans op ontploffingen.

**Gevaar van vloeistofinjec tie en materiaal onder hoge druk:**

Spruttmateriaal onder hoge druk, ook uit lekken, kan binnendringen in het lichaam.

Let altijd op de volgende punten, om injectie van materiaal te voorkomen:

- Zet de veiligheidsvergrendeling in de geblokkeerde stand wanneer er niet gespoten wordt.
- Blijf weg van de sputtmonden en van lekken.
- Sputt nooit zonder dat de tipbescherming geplaatst is.
- Voer de **DRUKONTLASTPROCEDURE** uit als u ophoudt met sputten of voor u begint met onderhoud aan de sputtapparatuur.
- Gebruik geen componenten met een lagere *maximum werkdruck* dan die van dit sputtapparaat.
- Laat kinderen nooit met dit apparaat werken.
- Zorg dat u stevig staat; het pistool kan een terugslag geven wanneer de trekker wordt ingetrokken.

**Als materiaal onder hoge druk door de huid is binnengedrongen** kan de verwonding eruitzien als een "gewone snijwond". Het is echter een ernstige verwonding! Roep meteen medische hulp in.

**Brand- und Explosionsgefahr:** Dämpfe von Lösemitteln und Lacken können sich entzünden oder explodieren.

Durch folgende Punkte kann die Brand- und Explosionsgefahr verringert werden:

- Gerät nur in sehr gut belüfteten Räumen verwenden.
- Mögliche Zündquellen, wie z.B. Dauerflammen, Zigaretten und statische Elektrizität von Plastik-Abdeckfolien, vermeiden. Im Spritzbereich kein Stromkabel ein- oder ausstecken und keinen Lichtschalter betätigen.
- Spritzgerät, Spritzobjekt sowie Material- und Lösemittelbeimer erden.
- Beim Spritzen in einen Eimer die Pistole fest an den geraden Eimer drücken.
- Nur einen elektrisch leitfähigen Airless-Materialschlauch verwenden.
- Niemals 1,1,1-Trichlorethan, Methylenchlorid, andere Lösemittel mit halogenisierten Kohlenwasserstoffen oder Materialien, die solche Lösemittel enthalten, in druckbeaufschlagten Aluminiumgeräten verwenden. Dies könnte zu einer chemischen Reaktion führen und in der Folge eine Explosion verursachen.

## ⚠ WARNUNG

**Gefahr durch Materialeinspritzung und Hochdruck:** Durch Spritzer oder undichte Stellen kann Material mit hohem Druck in den Körper gespritzt werden.

Um Einspritzungen zu vermeiden, stets:

- Die Abzugssperre an der Pistole verriegeln, wenn nicht gespritzt wird.
- Abstand zur Düse und zu undichten Teilen halten!
- Niemals ohne Düsenenschutz spritzen.
- Den **DRUCK ENTLASTEN**, wenn die Spritzarbeiten unterbrochen werden oder bevor Servicearbeiten am Spritzgerät durchgeführt werden.
- Keine Komponenten verwenden, die für einen geringeren Druck als den *zulässigen Betriebsüberdruck des Spritzgeräts ausgelegt sind*.
- Niemals Kinder an dieses Gerät lassen.
- Der Bediener muß beim Abziehen der Pistole auf einen guten Stand achten, da die Pistole beim Abziehen einen Rückstoß verursachen kann.

**Wenn Material mit hohem Druck in die Haut eindringt,** kann die dabei entstehende Wunde wie ein "einfacher Schnitt" aussehen. Tatsächlich ist es jedoch eine schwere Verletzung! In diesem Fall sofort einen Arzt aufsuchen.

# **Graco Standard Warranty**

## **Garantie Graco standard**

## **Graco-standaardgarantie**

## **Graco Standardgarantie**

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale by an authorized Graco distributor to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

**THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.**

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

**GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO.** These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

### **À L'ATTENTION DES CLIENTS DE GRACO PARLANT FRANÇAIS**

Les parties reconnaissent avoir convenu que la rédaction du présent document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.

### **VOOR NEDERLANDSTALIGE GRACO-KLANTEN**

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. De partijen zijn ermee akkoord dat het onderhavige document, evenals alle documenten, berichtgevingen en wettelijke procedures die hierin zijn vastgelegd, aangegeven of die hieruit voortvloeien, hetzij rechtstreeks, hetzij indirect, in het Engels worden opgesteld.

### **FÜR DEUTSCHSPRACHIGE GRACO-KUNDEN**

Die Parteien bestätigen, daß sie festgelegt haben, daß das vorliegende Dokument sowie alle anderen Dokumente, Mitteilungen und Gerichtsverfahren, die im Zusammenhang damit erstellt, verteilt oder eingeleitet werden, oder sich direkt oder indirekt darauf beziehen, in englischer Sprache sein sollen.

### **ADDITIONAL WARRANTY COVERAGE / AVÉNANT DE GARANTIE**

### **AANVULLENDE GARANTIEDEKKING / ZUSÄTZLICHER GARANTIEUMFANG**

Graco does provide extended warranty and wear warranty for products described in the "Graco Contractor Equipment Warranty Program".

Graco accorde une garantie étendue et se porte garant des produits décrits dans le "Programme de garantie d'équipements des fournisseurs Graco".

Graco biedt verlengde garantie en slijtagegarantie op producten die zijn beschreven in het "Graco-garantieprogramma voor Contractor-apparatuur".

Graco gewährt eine erweiterte Garantie und eine Verschleißgarantie für die im "Garantieprogramm für Graco-Contractorgeräte" beschriebenen Produkte.

# Technical Data / Caractéristiques techniques

# Technische gegevens / Technische Daten

Category	Data
Maximum working pressure	5000 psi (345 bar, 34.5 MPa)
Fluid orifice size	235462: 0.037 in. (0.94 mm) All others: 0.090 in. (2.3 mm)
Wetted parts	Stainless steel, Polyethylene, Polyurethane, Nylon, PTFE
Weight	18 oz (510 g)
Inlet	1/4 npsm(m)
Maximum material temperature	120°F (50°C)
* Sound pressure level	78 dBA
* Sound power level	87 dBA

\* Measured while spraying waterbase paint – gravity 1.36 through a 517 tip at 3000 psi (207 bar, 20.7 MPa) per ISO 3744.

\* Mesures effectuées lors d'une pulvérisation de peinture à l'eau – gravité 1,36 avec une buse de 517 à une pression de 3000 psi (207 bar, 20,7 MPa) selon la norme ISO 3744.

\* Gemeten tijdens het sputten met verf op waterbasis met een soortelijk gewicht van 1,36 en een 517 tip met een druk van 3000 psi (207 bar, 20,7 MPa) conform ISO 3744.

\* Gemessen beim Spritzen von Lack auf Wasserbasis – Gravität 1,36 durch eine 517er-Düse bei 207 bar (20,7 MPa) nach ISO 3744.
